Pouch Making, Low Profile Chest Rig

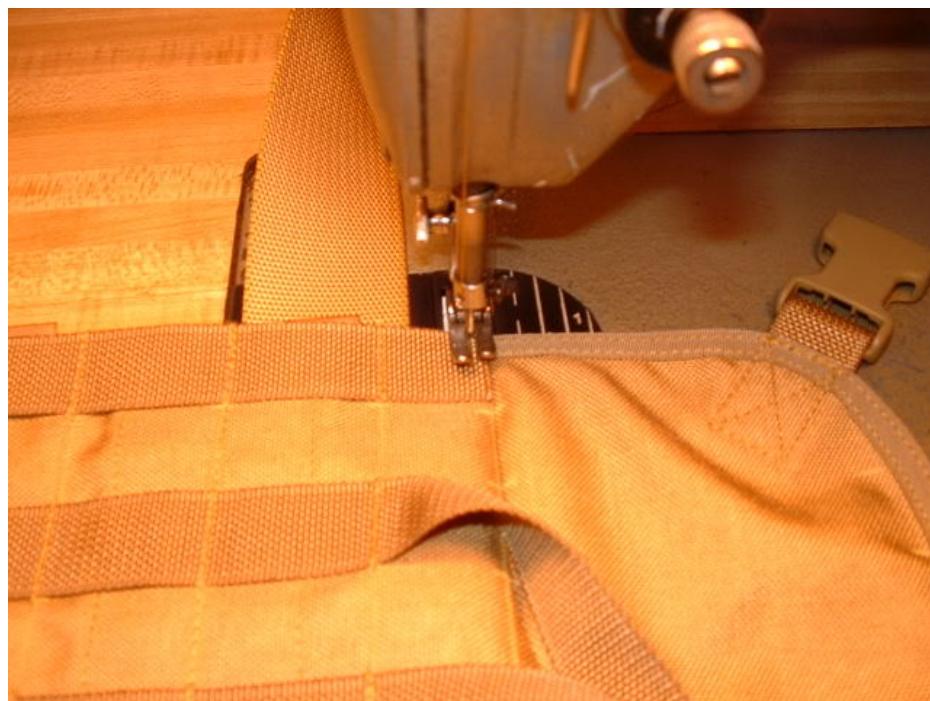

« on: August 22, 2006, 09:24:15 PM »

Ok, here's A way to make a single mag pouch, in a 4-mag chest rig format. Obviously, making a single detached mag pouch would be similar but I'll post pics of that later, too. I am using a technique very similar to pistol mag pouches, in that there is no allowance for thickness at the bottom; the material is simply folded under and sewn. When a mag is inserted, both front and back will bow together, creating a little pocket for the bottom of the mag.

The rig base and pouch panel with PALS webbing have been previously completed. We will now join the two together.

First, fold the pouch edge over and lay in place on the base. Plunge the needle. Check everything.

Stitch down the first line.

Turn the work 180 and stitch back to the start.

Turn the work again and stitch down to bottom.

Check the finished line.

Now do the other side. Plunge needle. Check everything.

Triple stitch the line again.

Check again.

And sew on.

Sides done. Check work.

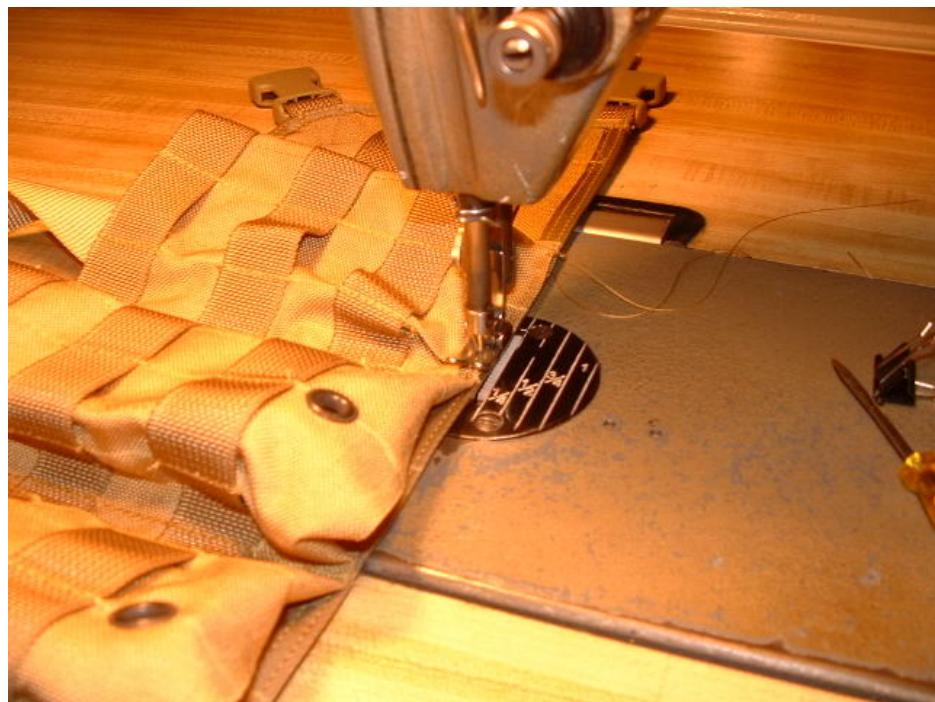

Now we'll close the bottom seam. Line up your center lines, clamp. Form 1st fold, plunge needle into fold (not all the way in the corner). Check.

Sew down to clamp. Remove clamp. Form 2d fold.

Sew to the end (of 1st pouch). Continue to march.

And there you go.

Thanks for the pics. That's much simpler than what I was trying to do.

Very informative, thanks! Too bad the forum doesn't have a rep system that effects your discount on the DIY store.

Diz, freakin outstanding post!

This is how I was thinking you did the 1 mag, and this is pretty much how I formed the bottom of my admin pouch although it is hard to see that in my shitty picture. At first I was thinking this was how the two mag was done also but when i tired it it obviously was a bit different.

Eventually I would like to capture posts like this for the main site so they don't get lost in the forum as it grows. Kind of an FAQ of sorts. Obviously all credit would go to the original author which leads me to Josh_w's comment there will be incentives in the form of discount coupons and freebies. But I have to devise a system for that so that it's fair for everyone.
