Edited 2/14/14 to add YouTube video-

An identical PDF tutorial is available on [Dropbox](#) for your records 😊

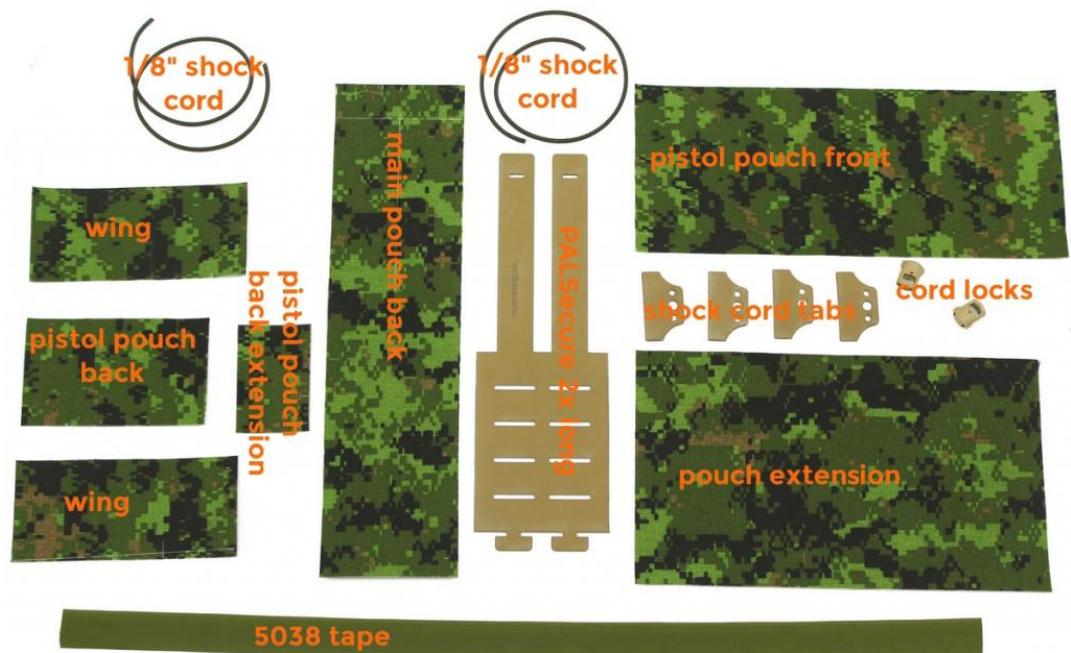

If something's been left out, clarification is needed, or you'd like a demonstration of a certain technique or step, please ask.

This tutorial is offered with the understanding that it's intended for those who already have a firm grasp on their craft.

Traditional narrow fabrics may be used as substitutes for laser cut parts.

Hems are 1/2", seam allowances are 1/2", three sides are bound 5/16" from the edge.

Lay out your materials. Make sure all components are present.

Hem one short side of each **wing**, one long side of the **pistol pouch back extension**, short sides of **pistol pouch front**, one short side of pouch extension.

Fold **pistol pouch front** in half matching hemmed edges. Locate shock cord tab and stitch the perimeter. Stitch **pistol pouch front** to **pistol pouch rear**. Keep your **wings** handy.

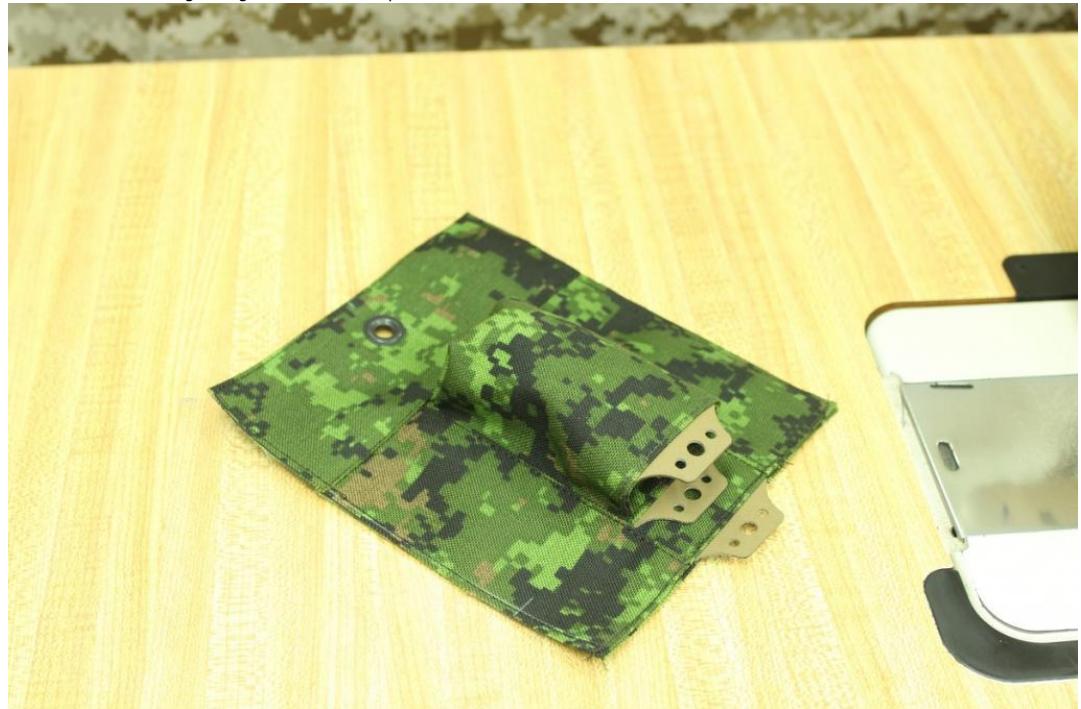

Stitch **wings** on either side of the completed **pistol mag pouch** and then top stitch. Stitch unhemmed, short side of **pouch extension** to the bottom of the **wings** and **pistol mag pouch** and then top stitch.

Fold two hemmed edges together and stitch perimeter.

1/2" from the top edge, stitch PALSecure to the **main pouch back** and locate shock cord tab

Stitch **pouch front to pouch back.**

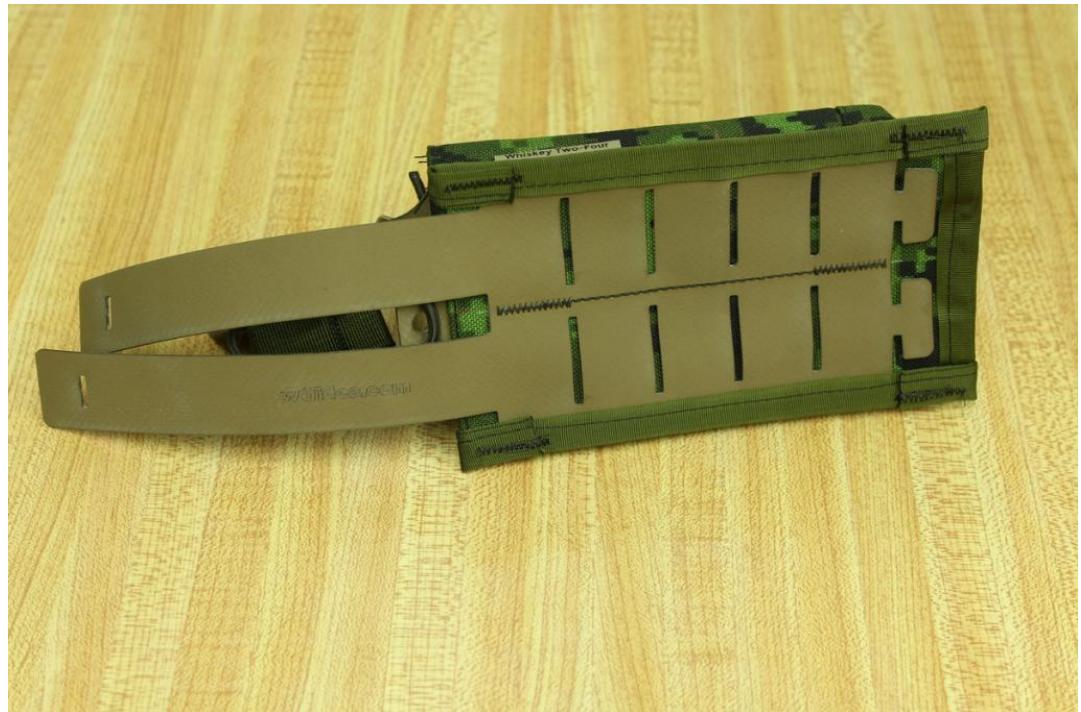

Tape edges, install **shock cord**, pull tabs, and **cord locks**.

Enjoy your super neato pouch!
