[TT Style MAV Tutorial](#)

Been meaning to post this for a while now. It is, for lack of better terms, an exact clone of the TT one piece MAV.

This is the only piece of cordura needed. The main body. I cut this one to 13.5" wide and 29" Long.

I used a 3/4" hem on the long sides.

Long sides hemmed.

Again, 3/4" hem on the short sides too. This will be slightly larger than the 6" x 27" finished size. It'll shrink down a tad when the webbing is sewn on.

1" hook and look cut to 9.5" and 3/4" webbing cut to 5". I like to fold and fuse the ends. Helps to keep things together.

Mark everything on center and sew around the velcro. Hook on one long side, loop on the other. Webbing goes between the velcro and cordura.

Outside

Laying out the webbing. I fold my ends in so I cut the strips to 29" long. Remember to fuse the ends.

The Inside

Fold end in and space 1/2" from top.

Use a cheater Strip.

Mark everything out should have 18 1.5" sections and about an inch to fold under on the other end.

Sew your webbing. Use a Cheater.

Stitch options. Back and forth the whole length or just back and forth on the webbing. I do the second and just travel between the webbing.

This is what you will end with.

3 apiece... 1.5" side release buckles, 1.5" triglides, 4" long 1.5" webbing, 36" long 1.5" webbing.

Start lower left. Sew in the buckle. Insert the end the depth of the hem.

Insert the strap 1", angle 45 and center on the corner.

Outside edge of top buckles are 8" from ends.

Vertically stitch the inside edges of the buckles. Remember not to sew the pocket closed.

Repeat on the other side. Only lower left is webbing not a buckle.

Awesome 😊 it should look like this.

Now sew on and use the other tutorials here to populate your new tactical real estate. Hope this helps. I know it helped my Posting Skills!

Nice Tut ThatGuy.

This is basically what our modular chest rig kit is going to be like.

Thanks for taking the time.

Very nicely done, thank you for posting!

My question would be the unfinished edges inside the "pouch". Is there any worry of them fraying? Granted that the majority of them will see little to no activity, but I would be concerned about the areas around the mouth of the pocket. Might be interesting to apply a little bit of edge binding in those areas to handle wear a little better, then hem them to the inside.
